banana slide 80

Fittings for sliding doors of up to 80 kg without fixed sidelight

Slide up your Life.

If you are rather a banana slider than a banana bender, you are spot on with Banana Slide for 80 kg doors. Despite its relatively high weight, Banana Slide can be moved particularly easily. It can be fixed to the ceiling or wall that easily that it saves you time and unnecessary frustration for a complicated and tiresome installation.

Essential Features

INTO THE SLIDE.

At **ONLEVEL**, we undergo continuous improvement and are constantly increasing our level: Sliding doors made of glass prove the suitable solution for a classy living environment within your own four walls. They do not only convey a more spacious impression to your home but make your eyes shine with their transparency. Glass sliding doors do not take up unnecessary space but emphasize the real dimension of your four walls as the reflection of glass surfaces makes spaces appear larger. The fashionable atmosphere of glass in interior spaces creates a harmonious and elegant effect.

Sliding doors made of satin-finished glass serve for visual protection yet make the room shine. In this way, you can enjoy your privacy amidst openness and brightness.

Sliding doors made of wood from **ONLEVEL** are the ideal substitute for doors in transit areas. Wooden sliding doors do not only form a functional unit between rooms, but they also have a positive influence on sound insulation properties when used together with the special accessories. Rooms can therefore be perfectly isolated from each other, both from a design-related and an acoustic point of view.
