# Adj. Aluminium Channel - Base Fix --- Installation Guide
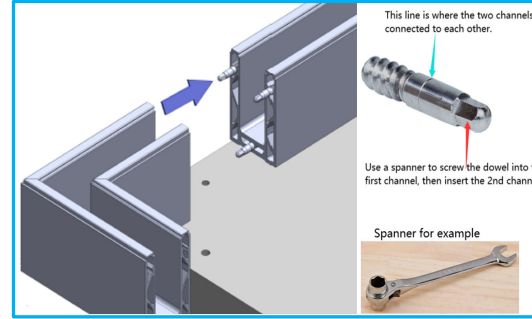

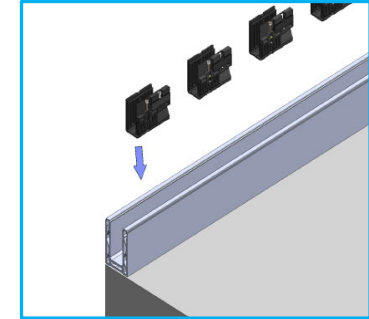

Step 1. Dirll screw holes on the ground

**Step 2.** Place the aluminium channel to position, and install it with anchor bolts.

Step 3. Use connector pins between two lengths of aluminium channels, or connect the channel to a 90 degree

This line is where the two channels connected to each other.

Use a spanner to screw the dowel into the first channel, then insert the 2nd channel
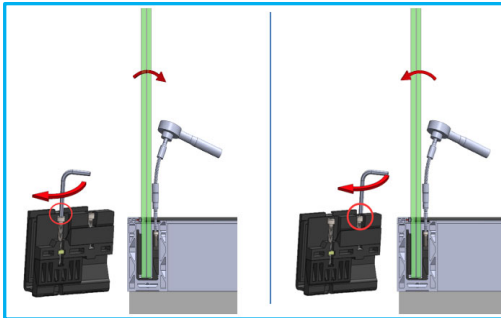

Spanner for example

**Step 4.** Place the adjustable wedges into the channel

**Step 5.** Click on the front-side top bead (with rubber gasket)

**Step 6.** Place glass and adjust the alignment between glass pannels

Step 7. Click on the back-side top bead (with rubber gasket)

Step 8. Stick the end cap with doube-sided tape

Step 9 (Optional). Aluminium cap rail available

Drainage holes included on the Aluminium Channel
